Bushing Well Insulated Plug**

## APPLICATION

The Chardon Bushing Well Insulated Plug is an accessory product to 15/25/28/35 kV 200A bushing well. It is designed to physically seal and electrically insulate the loadbreak bushing well. When installed on the bushing well interface, and properly grounded using the attached drain wire, the Bushing Well Insulated Plug provides an insulated, fully shielded, submersible for the energized 15/25/28/35 kV Class bushing well in deadfront equipment.

The body is molded of high quality EPDM insulation and has a molded semi-conductive EPDM shield. A molded ground tab on the shield allows attachment of drain wire to ensure deadfront construction. The Bushing Well Insulated Plug can be used for temporary or permanent applications.
